Check out the new poster for **RESIDENT EVIL: RETRIBUTION** showing some [high flying bullet casings](#) and an intense [Milla Jovovich as Alice](#).

We revisit the T-Virus with yet another native 3D production, this time shot on 3ality Technica's rigs. Director Paul W.S. Anderson typically delivers some very interesting camera shots, especially in 3D. [Love the aerial work that he does too.](#)

Here's the storyline for the movie:

The Umbrella Corporation's deadly T-virus continues to ravage the Earth, transforming the global population into legions of the flesh eating Undead. The human race's last and only hope, ALICE (Milla Jovovich), awakens in the heart of Umbrella's most clandestine operations facility and unveils more of her mysterious past as she delves further into the complex. Without a safe haven, Alice continues to hunt those responsible for the outbreak; a chase that takes her from Tokyo to New York, Washington, D.C. and Moscow, culminating in a mind-blowing revelation that will force her to rethink everything that she once thought to be true. Aided by newfound allies and familiar friends, Alice must fight to survive long enough to escape a hostile world on the brink of oblivion. The countdown has begun.

RESIDENT EVIL: RETRIBUTION opens on **September 14**. [Click here](#) for all of our coverage!
